

Project work for Master students

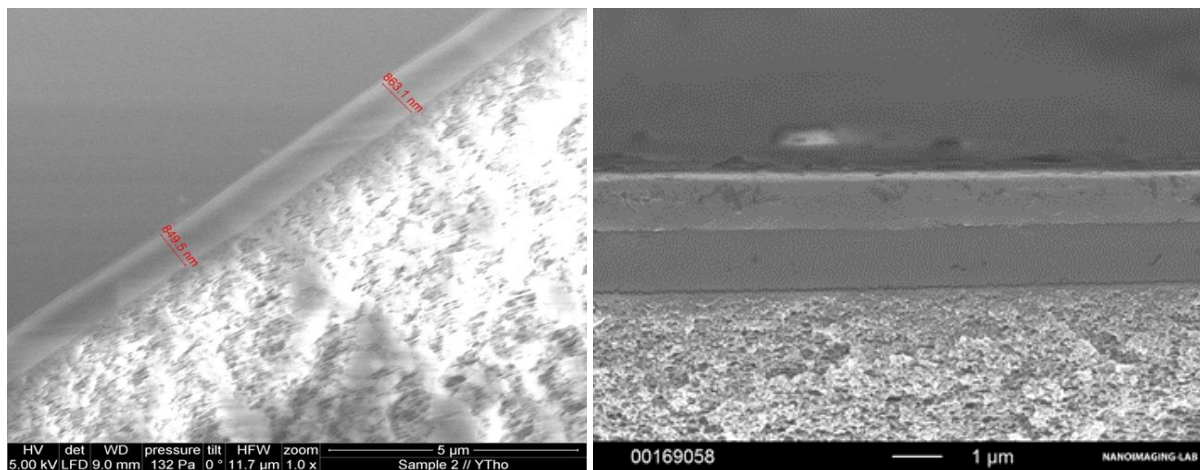

Are you looking for a laboratory to perform your project work for your Master Program?

Would you like to gain experience working in an industrial company?

If you are interested in exploring the world of polymer thin films and membranes, DeltaMem AG is offering you the opportunity to carry out your own project with us, either within the theoretical and/or applied field. The scientific understanding of our new products and exploring new insights are crucial for our growth and further developments in membrane technology. Therefore, we invite you to apply with your own project related to polymer thin films and membranes.

DeltaMem is a Swiss company that develops, produces and supplies worldwide state-of-the-art membranes (PERVAP™) for pervaporation. Pervaporation is a membrane-based separation technology applied in chemical, pharmaceutical and food industry. Our laboratory is in Allschwil and we will happy to meet you and discuss your interest and our industrial applications.
